

**TP-4160**

4160 VAC 3-phase Motor Control Unit

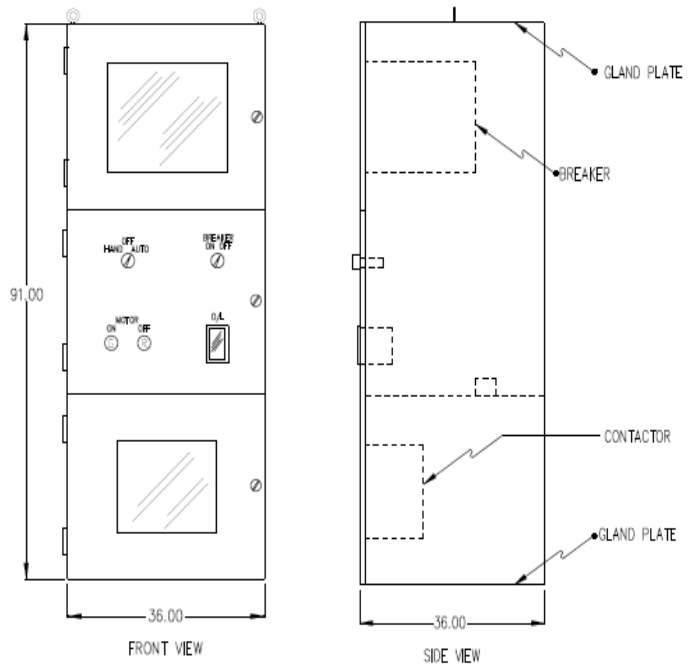

This **Texas Panel Company** exclusive is a standard non-reversing motor starter center for indoor and outdoor locations where the source voltage is 4160 VAC, 3 phase, for applications up to 1500HP.

The **TP-4160** includes:

- Vacuum contactor with 120VAC control voltage
- Motor protection relay
- Vacuum circuit breaker
- 500vA control power transformer
- NEMA 4/12 painted carbon steel enclosure with screw cover, 3-point padlockable handle and top & bottom gland plates
- Removable lifting eyes
- Viewing windows

Why choose the **TP-4160**?

- Smaller footprint
- Lower cost
- Customizable to interface with a variety of control systems
