

TP-RTPS
Remote Terminal Power Station

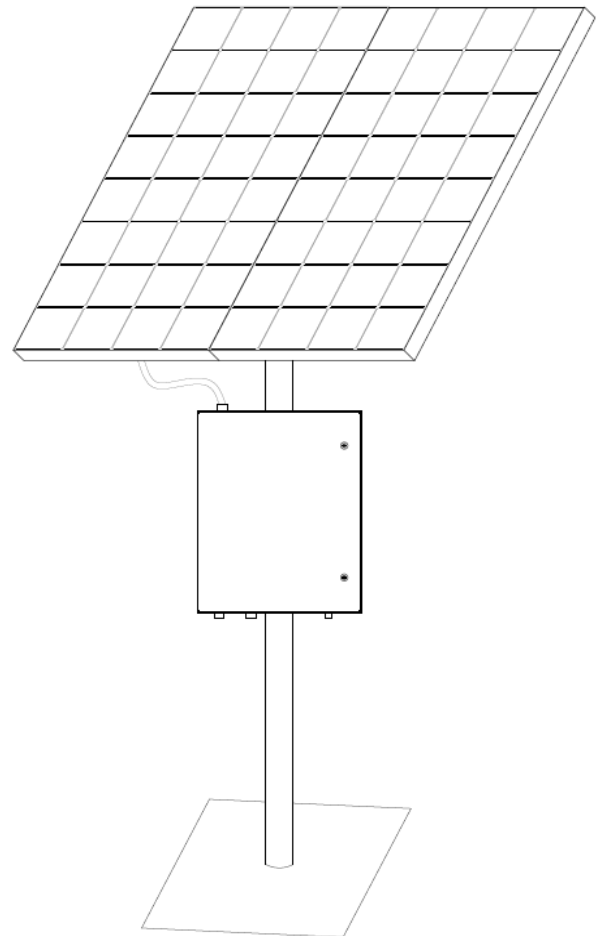

This **Texas Panel Company** original design uses solar panels to provide power and/or supply battery backup to remote equipment.

The **TP-RTPS** features:

- Solar panels with charger
- Systems start at 300W
- 12VDC or 24VDC
- Battery box with two conduit entries
- 8' stand with hardware included

Why choose the **TP-RTPS**?

- Shorter lead time than custom systems
- Suitable for a variety of applications, including hazardous locations
- Pre-drilled and pre-wired for quick set up
- On-site installation and integration services available
