

## TP-UFMP Universal Flow Measurement Panel

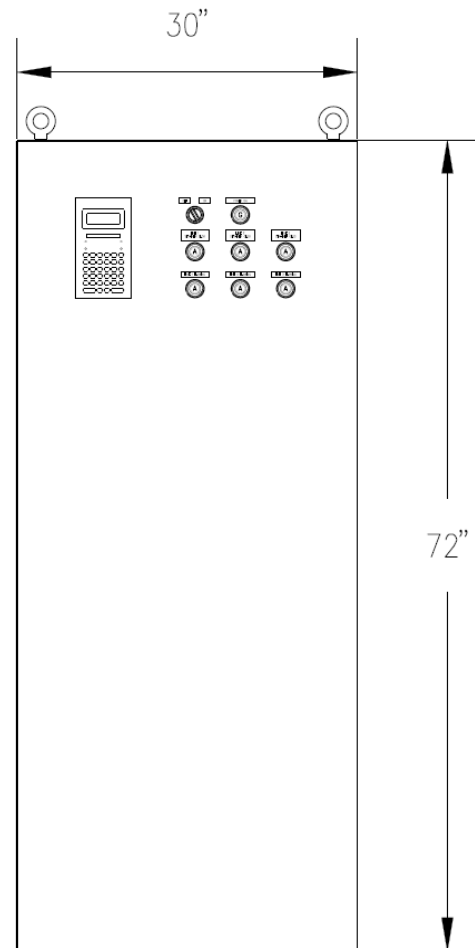

This **Texas Panel Company** exclusive is a standard industrial control panel for flow measurement systems. For use indoors or outdoors. For source voltage of 85 – 264 VAC or 90 – 350 VDC, 50/60hz.

The **TP-UFMP** includes:

- Flow computer for 3 meter runs + 1 master meter or prover
- Programmable Logic Controller (PLC)
- Industrial 8-port unmanaged Ethernet switch
- **TP-UPS**: 20A uninterruptible power supply
- 30mm pilot devices
- NEMA 4/12 painted carbon steel enclosure with 3-point padlockable handle
- Removable lifting eyes
- Optional touchscreen HMI

Why choose the **TP-UFMP**?

- Reliable technology
- Shorter lead time
- Suitable for LACT applications

Starting at \$39,562 USD. Dimensions may vary. Our standard control panels are expertly designed and manufactured to simplify the selection process and suit a range of applications. Project-specific customization is available upon request. Programming, Installation, and Integration services are also available.
